Myofunctional (Massage) Therapy

**Handling
instructions**

Please be aware that all dogs in pain or stressful situations can bite.

Describe the dog's general temperament –timid, excitable or cautious? How best to treat them to get them out of the car? Will the dog tolerate being physically moved (picked up) or would they prefer to be led on their leash? Do you use stairs or a ramp to get the dog in and out of the car normally? Where is it stored?

Vehicle accident plan brought to you by Full Stride Canine Myofunctional (Massage) Therapy

Health conditions

Does the dog have any health conditions which affect how they can be handled e.g. arthritis in the back so they can't be lifted etc?
